

Managing a clinical practice today involves paper - and lots of it. Get organized with Pragmedic Scanning Solution.

Pragmedic Scanning Solution

Pragmedic advances information access and document management capabilities with imaging technology. Pragmedic Scanning Solution provides the patient context and document workflow management necessary for the EMR.

While some solutions only incorporate parts of the record at a time (or worse, cannot incorporate some parts at all), physicians using Pragmedic Scanning Solution can store and access all kinds of documents and images, including correspondences and other paper documents, as part of a longitudinal clinical data repository and comprehensive EMR.

Pragmedic Scanning Solution enables physician organizations to manage document workflow and lay the foundation for a comprehensive EMR, while offering a path to the paperless office today.

Benefits Delivered

- Streamlines document management workflow
- Improves decision making and quality of care
- Reduce costs and Improve security
- Clinical Document Repository provides easy access to outline view, selection, and sorting of clinical documents
- Volumes of patient care documents can be viewed simultaneously and in many locations.
- Scan and Index tool manage the scanning and indexing of documents so that the work can be performed quickly and efficiently
- Documents may be printed, routed or faxed directly from the outline view.
- All access to records is audited for security purposes
- Records can be restricted from viewing
